Pima County, Arizona								
		Constant	2000 American Community Survey				%	%
	1990	\$2000	2000	2000	2000	Change	Change	Change
	Census	Personal Consump. Price index	Estimate	Lower Bound	Upper Bound	1990-2000	1990-2000	Constant 2000\$
The 2000 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability.								
The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

<b>These data are preliminary and should not be used for official purposes.</b>								
The 2000 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability.								
The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.								
School enrollment estimates from the 2000 American Community Survey will tend to be lower than similar estimates from the 2000 Census and 2000 Current Population Survey because the school enrollment estimates from the 2000 American Community Survey do not include individuals residing in group quarters, such as college dormitories.								
1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.								
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.								
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.								
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.								
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.								
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.								
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.								
8. An 'N' entry in the estimate, lower bound, and upper bound columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small. Displaying the data would risk disclosing information for individuals.
